The College of Arts and Sciences offers baccalaureate and masters programs in a wide range of disciplines encompassing the arts, the humanities, the social and behavioral sciences, and the natural and mathematical sciences. The college also offers associate degrees in paralegal studies and science for engineering; preprofessional programs in engineering, forestry, optometry, pharmacy, and medical sciences; and certificate programs in French, German, Japanese, and Spanish. The College of Arts and Sciences also is principally responsible for the University's general education program through which all University students are provided the opportunity to develop the skills, the knowledge, and the discernment essential to the full development of each person as an individual and as a member of society.

Through its many disciplines the College of Arts and Sciences strives to provide all students an excellent education with the most complete and current resources; to provide service to the University and to the community through its academic programs, through such facilities as the Hummel Planetarium and Psychology Clinic, and through the professional development and cultural opportunities sponsored by the College; and to encourage and support research and scholarship in all the disciplines included in the College.

DEGREES OFFERED

The College of Arts and Sciences offers the following baccalaureate degrees: Bachelor of Arts, Bachelor of Science, Bachelor of Fine Arts, Bachelor of Music, Bachelor of Music Education, Bachelor of Social Work, Bachelor of Individualized Studies, and Bachelor of General Studies. The Associate of Arts is offered in Paralegal Studies and the Associate of Science in Science for Engineering.

COLLEGE DEGREE REQUIREMENTS

General University degree requirements as set forth in Section Four of this *Catalog* as well as specific course requirements set forth in the descriptive curricula must be met by students completing programs administered by the College of Arts and Sciences. All students graduating with majors in the College of Arts and Sciences must have a 2.0 GPA in the major exclusive of any supporting courses. Students pursuing a minor in the College must have a minimum 2.0 GPA in the minor. At least twenty five percent of the courses in the major must be taken at Eastern

Kentucky University. In addition, individual programs may have specific requirements that exceed College requirements. Students should consult with an advisor or department chair to learn the particular requirements of a program.

Affiliated Activities and Resources

GULF COAST RESEARCH LABORATORY

Eastern Kentucky University is affiliated with the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. This affiliation provides undergraduate and graduate students with the opportunity to take courses and conduct research in marine sciences at an established, well equipped laboratory located on the Gulf of Mexico. Students electing to study at Gulf Coast Research Laboratory do not pay out-of-state tuition.

Courses are taught only at Gulf Coast Research Laboratory, Ocean Springs, Mississippi, during the summer. The Laboratory furnishes the staff for course work and research. Applications for the program and additional information are available in the departments of Biological Sciences, Chemistry, and Earth Sciences and in the Division of Natural Areas.

TECHNOLOGY INFORMATION CENTER

The College of Arts & Sciences Technology Information Center (TIC) is a Computer Center that offers a wide variety of services to faculty, staff and students. Located in Memorial Science 270, the Center houses a variety of technological equipment including 21 PCs all of which are connected to the Internet by a 1 GIG connection to quality laser printers, flatbed and slide/film scanners, black and white and color laser printing (including color poster printing), wide format printing and a film recorder (places digital images on film). Software packages available in the Center include Microsoft Office, Adobe Photoshop, Dreamweaver MX (for website development), SPSS and SAS as well as many "course specific" software programs.

We provide technical assistance to faculty and staff in the areas of computer-related problems, workshops for a wide variety of software packages, web development assistance and training in SmartBoard Technology. The Center can be reserved by faculty, staff, and graduate assistants for computer-based classes and workshops. The Center is also equipped with a SmartBoard, making it an excellent room for teaching.

Pre-Professional Curricula

PRE-ENGINEERING CURRICULA

There are two pre-engineering curricula offered by the College of Arts and Sciences.

In the first curriculum, referred to as the **Two-Two Curriculum**, students spend two years at EKU and study basic science, mathematics, and courses for their basic education. Students then transfer their credits to the engineering school of their choice. Students can usually complete a degree in engineering after two years of course work at the engineering school.

TWO-TWO CURRICULUM

Major Requirements 30 hours

PHY 201, 202, MAT 124*, 224, 225, CHE 111, 112.

Supporting Course Requirements 9 hours

PHY 221, TEC 190 and an approved programming language.

General Education Requirements 24 hours

Six hours of English composition, 18 hours selected from the humanities and social sciences to satisfy general education requirements at the chosen engineering school.

University Requirement 1 hour

ASO 100.

Total Curriculum Requirements 64 hours

*A preparatory course (MAT 109) may be required before admission to MAT 124.

THREE-TWO CURRICULUM

In the second curriculum - the **Three-Two Curriculum** - students spend three years at EKU and then take two years of work in engineering at the University of Kentucky or Auburn University and earn a baccalaureate degree from EKU in physics or chemistry and an engineering degree from the engineering school. The additional year spent at EKU allows students to do more work in a science major, thus improving the breadth of their background.

Variations occur depending upon the engineering degree sought and the differing requirements of the University of Kentucky and Auburn University. Inquiries concerning a specific program should be addressed to the pre-engineering advisor, Department of Physics and Astronomy or Department of Chemistry. A program representative of the first two years is given in the **Two-Two Curriculum** above. The third year curriculum will depend primarily on the undergraduate major sought, either physics or chemistry.

A third option available to a student would be to complete requirements for a baccalaureate degree in physics or chemistry at EKU and then to apply to a graduate school in engineering for admission and graduate studies.

PRE-FORESTRY CURRICULUM

Arrangements made through the Southern Regional Education Board provide for students who wish to prepare as professional foresters to do the first three years of their work at EKU and complete their training in two years and one summer at University of Kentucky or any other accredited school of forestry.

Students may elect a three-year program and graduate with a Bachelor of Science degree with a major in biology by transferring 30 semester hours from an accredited school of forestry.

*A preparatory course (MAT 109) may be required before admission to MAT 124.

PRE-OPTOMETRY CURRICULUM

Students desiring to enter the competition for admission to an optometry school must complete a minimum of three years of pre-optometry courses and most schools require the student to earn a baccalaureate degree before applying. The application deadline for optometry schools is usually in December. Students must also achieve a high score on the Optometry Admissions Test. A minimum of three years work is required in the optometry school for the Doctor of Optometry (O.D.). Most optometry schools require four years for the O.D., and several universities have graduate programs leading to the M.S. and Ph.D. degrees in addition to programs leading to the O.D.

Requirements for admission to optometry schools vary. Students wishing to enter a pre-optometry program should immediately secure transfer information from the optometry school of their choice and then consult with their pre-optometry advisor.

Courses which students may take to meet requirements for admission to optometry schools should include the following.

Major Requirements 32 hours
BIO 121, 141, 320, CHE 361, 362, 366, 367, PHY 131, 132.

Supporting Course Requirements 19 hours

University Requirement 1 hour
ASO 100.

Total Curriculum Requirements 73 hours

Most optometry schools have established quotas on the number of students that they will accept from each state. Because of this limitation, students must be accepted by the school of optometry and be certified as a resident of the state in which they live. Present circumstances are such that Kentucky residents will stand the best chance for acceptance at Indiana University, the University of Alabama, and Southern College of Optometry at Memphis, which have contracts with the Commonwealth of Kentucky. Approved students are exempt from the out-of-state tuition charge at the above schools.

For residents in Kentucky to be accepted under the Kentucky quota, application must be made directly to one of the three contract schools listed above. A Certificate of Residency will be

needed which may be secured from the Executive Director, Council on Postsecondary Education, Frankfort, KY 40601. Students from other states should make application to the equivalent board in their state. For further information, the student should consult with the Pre-Medical Science Advisor.

PRE-PHARMACY CURRICULUM

Students who plan to enter the field of pharmacy may take two years of pre-pharmacy and transfer these credits to a pharmacy school. The courses listed below will meet the requirements of most pharmacy schools. Students wishing to enter the curriculum should determine the admission requirements of the pharmacy school of their choice and after consulting their pre-pharmacy advisor, determine which courses to take.

ANTHROPOLOGY (B.A.)

CIP Code: 45.0201

Anthropology is the study of human diversity. It explores the meaning of being human – from the study of culture and social relations, to human biology and physical evolution, to language, to music, art and to vestiges of human habitation. Anthropology addresses fascinating questions such as how peoples' behavior changes over time, how and why people from distant parts of the world and dissimilar cultures are in many ways similar, how the human species has evolved over millions of years, and how individuals understand and operate successfully in distinct cultural settings. Anthropology includes four sub-fields: cultural anthropology, physical anthropology, archaeology, and linguistics. The Anthropology program at ECU offers exposure to all of these sub-fields, with the opportunity to specialize, if so desired. Two great reasons to study anthropology include: 1) study topics are intellectually exciting; and 2) Anthropology prepares students for excellent job and opens doors to various career paths. Anthropological study provides training particularly well suited to the 21st century. Anthropology is the only contemporary discipline that approaches human questions from historical, biological, and cultural perspectives. As a result, career opportunities exist in academic, corporate, nonprofit and government settings. Many anthropologists with bachelor's degrees work for contract archaeology firms at archaeological sites, in physical anthropology laboratories, and in museums in a wide range of areas. International health organizations and development banks employ anthropologists to help design and implement a wide variety of programs. Governmental organizations use anthropologists in planning, research, and managerial capacities. Forensic anthropologists find work in university and museum settings along with police departments to help identify mysterious or unknown remains. Anthropology is a career that embraces people of all kinds. It is a discipline that thrives with heterogeneity – in people, ideas, and research methods. Anthropologists know the wisdom of listening to multiple voices and linking the work coming from researchers who bring different backgrounds and apply various approaches to their endeavors.

SOCIAL WORK (B.S.W.)

CIP Code: 44.0701

To major in social work a student must declare social work as a first major. To enroll in either of the practicum courses, SWK 390 or SWK 490, a student is required to complete the prerequisites for the specific course; maintain a cumulative grade point average of 2.25; attain a minimum grade of "C" in each course specified for the major and supporting courses; and apply for admission to the specific practicum course the semester prior to enrollment. For additional information, contact the practicum instructor.

ADMISSION

Any student who is accepted by the University Admissions Office and declares their major as social work will be admitted as a pre-social work major. Admission to pre-social work does not guarantee admission to the Professional Social Work Program. For admission requirements and procedures see the Program Director.

MISSION

The essential purpose of the Social Work program is to prepare the student for beginning generalist practice. This preparation will provide Kentucky, particularly the Eastern Kentucky region, with social work professionals capable of intervention with different size systems in a variety of settings. Another purpose of the program is to produce graduates who have the essential knowledge and skills to enter graduate programs and/or continue life-long learning. The program prepares students to address issues of social oppression, social and economic injustice, and various forms of violence at the personal, social and cultural levels. The dynamic curriculum is responsive to the new realities within which the social worker must serve the client, the profession, and society.

The primary purpose of the social work profession is to enhance human wellbeing. Social workers help meet the basic human needs of all people and empower those who are vulnerable, oppressed, or living in poverty. Social workers help people identify and manage the environmental forces that create, contribute to, and address problems in living. Social workers are an integral part of most non-profit agencies and also offer their services and knowledge in private practice.

SOCIOLOGY (B.A.)

CIP Code: 45.1101.01

The sociology program provides students with an advanced understanding of social structure, social institutions, human groups, social stratification, social interaction, social relationships, social deviance (crime, juvenile delinquency), and social change. Sociology faculty are skilled in teaching the theoretical foundations of sociology and methods of social research, while they teach students to think critically. The broad knowledge base of sociology, combined with basic skills in research methods and analysis, contributes to a person's flexibility in a rapidly changing economy where specialized jobs often become outdated. Students who major in sociology possess the advantage of a more general foundation upon which to adapt to changes in the labor market, because they are taught to think critically, communicate effectively, and respond constructively to the challenges and opportunities they will encounter. A major in sociology provides a gateway to many different careers. Many sociology graduates move into professional careers in the following areas: social services, law enforcement, human relations, law and legal services, policy analysis, teaching, and health fields. Others find employment in management and administrative careers in government agencies as well as in a wide range of private sector firms. Still others work to achieve their goals in less traditional careers such as grassroots activism or private entrepreneurship.

GEOGRAPHY (B.A.)
CIP Code: 45.0701

Program Objectives
 The mission of the Bachelor of Arts in Geography is to sustain a progressive and supportive environment where students can grow intellectually and professionally by: 1) providing a comprehensive and modern curriculum that affirms geography’s historic position at the center of a strong liberal arts tradition; 2) providing a scholastic and experiential foundation that prepares all students to live and work in the information age of a global society; and 3) promoting integrative and holistic geographic perspectives on regional issues (local, regional, and global) through interdisciplinary collaboration in research and teaching. The program values the fundamental joy of learning, all types of intellectual exploration, and pedagogical innovation. Geographic knowledge, theories, and methods provide analytical techniques applicable to a wide range of questions asked over a broad spectrum of occupations. A bachelor’s degree in geography provides marketable skills and the broad perspectives on environment and society that enable graduates to move beyond entry-level positions. Geography also provides a sound foundation for students who plan to enter graduate work in a variety of fields, from geography to business, land use planning, law, and medicine. The potential for practicing geography in private enterprise and government has grown considerably in recent years. In fact, the U.S. Department of Labor identified geotechnology as one of the three most important emerging and evolving fields along with nanotechnology and biotechnology in

2004. The Department of Geography at EKU is committed to preparing its students for careers in geography as demonstrated by its high quality curriculum, involving undergraduates in faculty research, and its rich history of securing student internships. All students should emerge from the geography major at EKU with realistic ideas about how to implement their geographic knowledge and skills in occupational pursuits in a variety of settings.

HISTORY (B.A.)

CIP Code: 54.0101

Program Objectives

Upon successful completion of this program, graduates will be able to: 1) demonstrate knowledge of U.S. history, European history, selected aspects of non-Western history at a high level; 2) demonstrate their ability to write effectively (all students in the program will complete term papers as part of their major requirements); and 3) execute a major research project utilizing both primary and secondary sources. All students in the baccalaureate program will submit prior to graduation a formal research project which includes both primary and secondary sources. In addition to pursuing careers in education, graduates of this degree program have found employment in business, journalism, public history, library work, government and law. A history degree is excellent preparation for law school as well as graduate programs in library science, public history and many other fields. Many employers value the research, writing and analytical skills developed through the study of history.
